WORK EXPERIENCE

Upwork

Freelance Full-Stack Developer

Several clients (Remote)

MAR 2024 - PRESENT

- Designed and implemented RESTful APIs to support web and mobile applications.
- Built and shipped features across frontend (React, Nuxt), mobile (React Native), and backend systems.
- Delivered solutions using NestJS, Django, and Laravel based on project requirements.
- Collaborated directly with founders and product teams to translate business requirements into production-ready systems.
- Maintained long-term client engagements with consistent positive feedback and repeat work.

Ablaze Labs

Backend Engineer & Team lead

Ethiopia, Addis Ababa

DEC 2022 - APR 2024

- Wrote clean, maintainable code using best practices and industry standards
- Efficiently managed Git version control, resolving conflicts, merging branches, and deploying timely code changes
- Led backend development and mentored engineers through code reviews and architectural guidance.

beU Delivery
